

Virginia Energy Efficient Appliance Rebate Program

Program Fact Sheet

Virginia's appliance rebate program will launch at 11AM on April 28 and continue until all funds are depleted.

To help administer this program, DMME has partnered with several utility companies across the Commonwealth who will offer ratepayer funded rebates to augment and expand this American Recovery and Reinvestment Act program. Most people will claim a rebate through DMME. However, customers of the partner utilities will claim rebates for certain appliances through the utility.

Columbia Gas

- Furnace
- Storage Water Heater
- Tankless Water Heater

James City Service Authority

- Clothes Washer

Beginning April 28, consumers should go online to reserve their rebate prior to purchase:

www.dmme.virginia.gov/arra.shtml

Program Eligibility Requirements

- ✓ Appliance must be for residential use at a Virginia residence
- ✓ Appliance must be purchased from a vendor in Virginia OR online from a vendor with a Virginia location
- ✓ Appliance must replace an existing like appliance and the old appliance must be recycled or hauled away for proper disposal
- ✓ New appliance must be ENERGY STAR qualified
- ✓ Rebates limited to one appliance per household
- ✓ Rebates will **NOT** be available for items purchased prior to April 28
- ✓ Applicant has sixty days after reservation to submit their claim

Why these appliances?

DMME determined appliance selection and rebate levels in consultation with the Department of Energy and our utility partners. Items to be included and the rebate amounts were selected to best accomplish the rebate program's goals of increasing residential energy conservation through more efficient appliances and stimulating the Commonwealth's economy and job growth through additional retail sales of ENERGY STAR products.

Each partner utility processes rebate claims differently. Customers who come to DMME's website will be directed to the appropriate utility website for rebate claims
